

AHERA COMPLIANCE NOTIFICATION

October 6, 2016

Doug Guenther
Bill Klayer
Elder High School
3900 Vincent Ave.
Cincinnati, Ohio 45205

Dear Parents, Teachers, Building Occupants and Employees:

In the past, asbestos was used extensively in building materials because of its exceptional insulating, sound absorbing, and fire retardant capabilities. Virtually, any building constructed before the late 1970s contained some form of asbestos. Intact and undisturbed, asbestos materials generally do not pose a health risk to building occupants. Risk levels increase when damage, deterioration over time or neglect causes asbestos fibers to become released into the air. These fibers can lead to chronic health problems in some individuals if inhaled.

In 1986, the United States Congress passed the Asbestos Hazard Emergency Response Act (AHERA) which required (and continues to require) schools to be inspected to identify any asbestos-containing building materials in buildings owned, operated or otherwise used for school purposes. During these original inspections, materials were located, sampled, quantified and ranked according to the hazards observed. Every three years, that same regulation requires Elder High School to have a re-inspection of the materials previously identified to determine whether the condition of those materials have changed and to make recommendations on managing or removing the asbestos-containing building materials. The date of the last re-inspection for our school was May, 2016. ATC Associates Inc of Cincinnati, Ohio is scheduled to perform this re-inspection during the month of May, 2019.

Further, AHERA required that an initial Management Plan, be generated and active for each school building by July 1989. The plan is a compilation of all inspection data generated, required compliance notification, abatement projects, training of employees and short-term workers and six month periodic surveillance events. Elder High School developed a plan as required. This document is available for public review and is located in the Business office. The school has a designated person who is responsible for AHERA compliance work. These individuals are Doug Guenther and Bill Klayer and can be contacted at 513-921-3744.

It is the intention of Elder High School to comply with all federal and state regulations controlling asbestos and to take whatever steps are necessary to ensure students and employees a safe and healthy environment in which to learn and work. Should you have additional questions or comments concerning asbestos, the School's Management Plan or any other safety and health need, please do not hesitate to contact our office.

We look forward to a successful, safe and rewarding school year.

Sincerely,

Doug Guenther
Bill Klayer
